

Fast and Accurate. Do it the...

KWIK-WAY®

Kwik-Lathe

On-The-Car Brake Lathe

Simply mount in place of the caliper.

Attach the optional Power Drive quickly for the constant speed gear drive that assures a consistent finish. Can be used on powered and non-powered wheels.

The Kwik-Lathe produces the most accurate machined surface.

GUARANTEED ZERO RUNOUT.

Consider The Advantages:

A major advantage of the Kwik-Lathe over other units is fast setup, simple operation and low cost. The Kwik-Lathe can be set up in minutes and operated by any technician with average skill and experience.

The Kwik-Lathe ensures the caliper is always square to the rotor. Machining a rotor with a hub-mounted unit cannot produce this total alignment and high level brake performance. Rotors machined with the Kwik-Lathe exceed OEM specifications.

KWIK-LATHE SPECIFICATIONS

Max Rotor Thickness	1-5/8"
Max Rotor Diameter	13.5"
Feed Rate	.002-.006"
Shipping Weight	40 lbs

KWIK-LATHE STANDARD ACCESSORIES

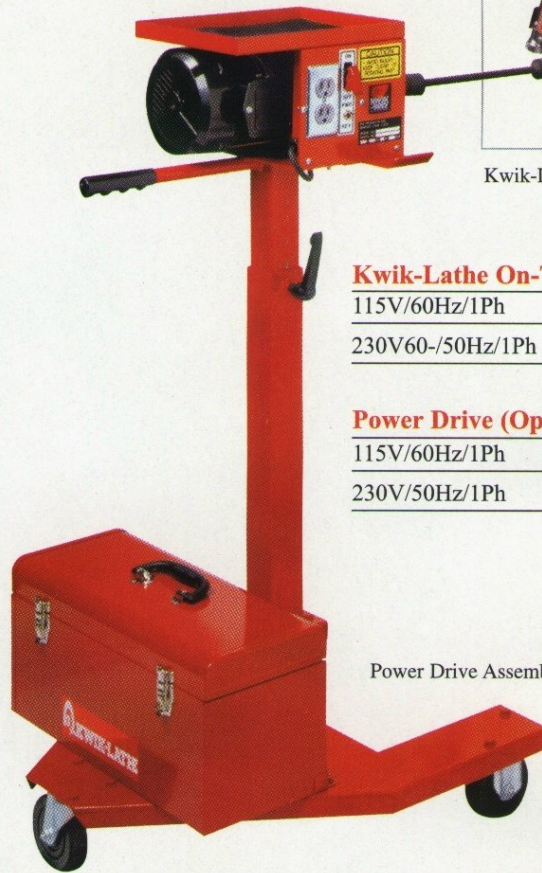

DESCRIPTION	PART #
