BL50 / Milling Machine for Connecting Rods and Caps

SPECIFICATIONS

Motor power	mm	1.1
Hobs external diameter	mm	50
Dimensions	mm	750x650x1350
Net weight	kg	1280

STANDARD EQUIPMENT

- Service kit
- Measuring device with centesimal dial gauge
- Spindle shaft support for hobs with distance rings
- Steel sheet base
- Operating manual

BL50 is designed for resurfacing the parting face of connecting rods and main bearing caps. The large capacity and robust construction make it ideally suited for both automotive and heavy duty diesel applications. The adjustable clamping mechanism allows the operator to surface caps on the original parting line even when the clamping surface is not square with this area. These features make it the ideal companion for rod and main bore resizing equipment.

RECOMMENDED EQUIPMENT

- AZ836.01 Pair of hobs pitch 2,5X60 mm (for FIAT)
- AZ836.02 Pair of hobs pitch 3,0X60 mm (for FIAT/SCANIA)
- AZ836.03 Pair of hobs pitch 3,15X60 mm (for PERKINS 6534)
- AZ836.04 Pair of hobs pitch 3,175X60 mm (for PERKINS 4108)
- AZ836.06 Pair of hobs pitch 4,0X60 mm (for MWM)
- AZ836.07 Pair of hobs pitch 3,0X60mm (for VOLVO)
- AZ836.09 Pair of hobs pitch 2,0X60 mm (for WM)
